Profile

Senior Backend Engineer with 8+ years of experience designing and building distributed systems and backend applications. Proficient in Python, Kafka, PostgreSQL, Kubernetes, and AWS. Passionate about clean architecture, event-driven systems, and mentoring junior engineers. Proven track record of delivering scalable real-time data pipelines serving millions of users.

Experience

TechCorp Solutions

São Paulo, SP

Senior Software Engineer

Mar 2021 – Present

Python, Kafka, PostgreSQL, Docker, Kubernetes, AWS

Platform team — internal developer platform serving 200+ engineers

- Architected a high-throughput event-driven data pipeline processing 10M+ events per day, leveraging Kafka for event streaming and PostgreSQL for durable storage, enabling scalable and responsive data processing.
- Led the migration of a monolithic application to a Kubernetes-based microservices architecture, reducing deployment time by 80% and significantly improving system resilience.
- Mentored 4 junior engineers through structured pair programming and code review practices
- Reduced system latency by 40% through query optimization and caching strategy implementation

StartupXYZ

Campinas, SP

Software Engineer

Feb 2018 – Feb 2021

Python, Django, PostgreSQL, React, Docker

- Built a RESTful API serving 50K+ daily active users with 99.9% uptime over 2 years, enabling real-time data access for the entire customer base.
- Developed real-time notification system using WebSockets, improving user engagement by 25%.
- Implemented CI/CD pipeline with GitHub Actions, reducing release cycle from 2 weeks to daily deployments.

WebDev Agency

São Paulo, SP

Junior Software Engineer

Jan 2016 – Jan 2018

JavaScript, React, Node.js, MongoDB

- Created automated testing suite achieving 90% code coverage across all client projects
- Collaborated in agile team of 6 developers, delivering projects on time and within budget

Education

Bachelor of Science in Computer Science

São Paulo, SP

Universidade de São Paulo (USP)

Feb 2012 – Dec 2016

GPA: 3.7 • Summa Cum Laude

Skills

Programming Languages: Python, JavaScript, TypeScript, Go, SQL

Frameworks & Libraries: Django, React, FastAPI, Express.js, Pytest

Databases & Tools: PostgreSQL, MongoDB, Redis, Kafka, Docker, Kubernetes

Cloud & DevOps: AWS, Terraform, GitHub Actions, Prometheus, Grafana

Projects

FastAPI Admin

Python, FastAPI, SQLAlchemy

Core contributor

Jan 2023 – Jun 2024

Open-source contributor to FastAPI Admin – an admin panel integration library for FastAPI applications, featuring role-based access control and automatic CRUD generation. Designed RBAC system with fine-grained permissions and reduced boilerplate by 60%.

- Designed RBAC system supporting fine-grained permission assignment across 10+ resource types

- Reduced boilerplate by 60% compared to manual admin panel implementation
- URL: github.com/fastapi-admin/fastapi-admin

Personal Blog Platform

Next.js, PostgreSQL, Tailwind CSS

Full-stack blog platform with Markdown support, tag system, and analytics dashboard serving 5K monthly visitors

URL: blog.joaosilva.dev

Certifications

AWS Solutions Architect - Associate

Amazon Web Services — Jun 2023

Certified Kubernetes Administrator (CKA)

CNCF — Nov 2022

Languages

Portuguese: Native
English: Fluent (C2)
Spanish: Intermediate (B1)

Online

Portfolio: [localhost](#)

Awards

Engineering Excellence Award — TechCorp Solutions

Dec 2023

Recognized for architecture leadership in the microservices migration program

Volunteer

Python Brasil

Remote

- Curated 40+ talks for the annual Python Brasil conference with 500+ attendees
- Established code of conduct enforcement process adopted by 3 regional meetups

Conference Track Chair

Jan 2022 - Present
